

PRODUCT PITCH

Turn content into confidence.

The AI-powered study platform that converts books into adaptive practice—and keeps learners coming back.

Learn smarter. Remember longer.

AI-GENERATED

What drives photosynthesis?

Daily review

12 cards due

START

7 day streak

More content has not created better learning.

Learners are surrounded by information—but still struggle to turn it into durable knowledge.

01 Passive consumption Reading and highlighting feel productive, but rarely create enough retrieval practice.

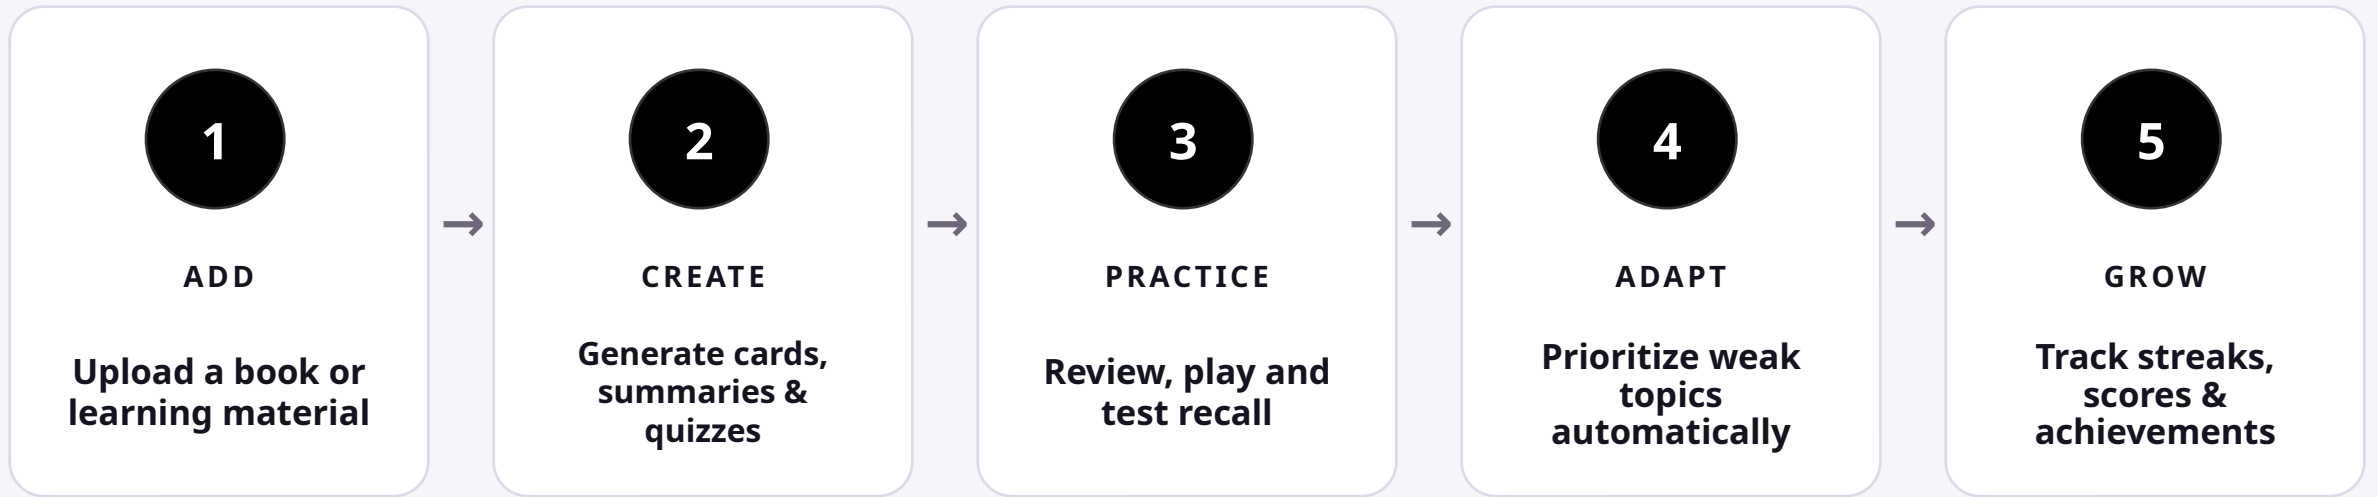

02 Fragmented tools Notes, flashcards, quizzes, games and analytics live in separate products and workflows.

03 Motivation decays Without visible progress, timely reminders and social momentum, consistency disappears.

The gap is not access to information. It is turning information into a habit of active recall.

One continuous loop from source material to mastery.

MindFlip removes setup friction, adapts practice, and makes progress visible.

Less time building a study system.

More time actually learning.

Your content becomes an instant study system.

AI handles the heavy setup work while the learner stays in control.

Upload once. Practice in multiple ways.

- **Smart ingestion**
Upload books, edit the table of contents and organize a reusable library.
- **Multi-format generation**
Create flashcards, summaries, scenarios and quizzes from selected chapters.
- **Asynchronous workflow**
Keep moving while generation runs, with progress and status visible.
- **Regenerate with intent**
Refresh scenarios or focus practice on the material that matters now.

Practice that changes with the learner.

Every interaction becomes a signal for what to review next.

Spaced repetition

Schedules review based on memory strength.

Daily review

Surfaces due cards in one focused queue.

CARD 08 / 24

**Explain the difference
between
mitosis and meiosis.**

Again

Hard

Good

Easy

Weak-topic detection

Uses quiz performance to highlight gaps.

Offline progress

Keeps study moving and syncs when connected.

Learning people want to return to.

Motivation is designed into the experience—not bolted on afterward.

STREAKS

Turn consistency into a visible daily win.

ACHIEVEMENTS

Celebrate meaningful milestones and mastery.

CHALLENGES

Invite peers, compare results and create urgency.

STUDY GAMES

Practice through memory match, lightning rounds, RPG battles and more.

GROUPS

Set shared goals, collect materials and learn together.

SCORECARDS

Package progress into a clear, shareable story.

The outcome: a stronger habit loop—cue, practice, reward, repeat.

One platform. Clear value for every learning stakeholder.

A shared system connects individual practice with the people supporting it.

LEARNERS

Study faster

Turn required reading into active practice; know what to review; stay motivated.

- AI study sets
- Daily review
- Games & streaks

EDUCATORS

See the gaps

Track outcomes, guide attention and support learners with evidence—not guesswork.

- Analytics
- Groups
- Scorecards

ORGANIZATIONS

Scale support

Offer a consistent learning workflow across users, content and devices.

- User management
- Shared goals
- Mobile + web

The difference is the connected system.

Most tools solve one moment. MindFlip connects the entire learning journey.

CONNECTED EXPERIENCE

A product foundation ready for real learning behavior.

MindFlip pairs a polished learner experience with the operational capabilities needed to grow.

EXPERIENCE

Responsive web + installable PWA

Mobile-aware navigation • dark mode • offline progress

LEARNING ENGINE

Content generation + adaptive practice

Chapter-aware generation • spaced repetition • weak-topic insights

ENGAGEMENT

Motivation + community loops

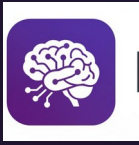

Notifications • streaks • achievements • challenges • groups

OPERATIONS

Plans, usage and observability

Entitlements • credits • billing • admin analytics • automation

Designed for the full lifecycle: activate → learn → retain → expand.

MINDFLIP

Make every study session count.

Transform content into practice.
Transform practice into confidence.

THE MINDFLIP PROMISE

Less setup.

Smarter practice.

Visible progress.
